Divisibility Rules Poem (Factors)

I'm #2 and I'll be your friend, as long as an even # is on the end,

#3 will work for me, you see, if the sum is divisible by 3.

The #4 won't be such a chore, if the last two are divisible by 4,

The #5 is my biggest hero, he has to end in 5 or 0.

The #6 will always go into me, as long as so does 2 and 3.

#9 will go into me just fine, if the sum is divisible by 9.

I'm #10 and this you should know, I always end in a big fat zero!
